

OJSC MMC Norilsk Nickel invites an international tender

In order to develop and implement the design for processing the electrolyte sludge, containing precious and non-ferrous metals, at the Company's Polar Division and OJSC Kola MMC, OJSC MMC Norilsk Nickel on 07.11.2011 invited an international tender to select a contractor for doing the scope of works under "The new metallurgical shop construction" project.

This project will be implemented at the Copper Plant of the Polar Division (Norilsk) in two start-up complexes:

First start-up complex (SC-1) includes:

Construction of production and administrative complexes, garage for specialized vehicles and fencing along the perimeter.

Implementation of electrolyte sludge processing technology with subsequent production of precious metal concentrates, selenium and tellurium technical.

Second start-up complex (SC-2) includes:

Implementation of electrolyte sludge processing technology with subsequent production of refined metals.

The scope of works must be done on a "turn-key" basis (EPC) including, inter alia:

- implementation of engineering surveys and examination of construction elements;
- development of design and working documentation, including approval of the design documentation by the State expertise;
- supply of equipment, its spare parts and technical documentation;
- personnel training;
- performance of construction, installation, start-up works, equipment commissioning, provision of two-year warranty period;

Deadline for submitting technical and financial proposals (TFP) is 07.05.2012.

Commencement of the contract execution period is 16.11.2012

Deadline for the project implementation (SC-1 and SC-2) is 30.09.2015.

To receive the general conditions for preparation of the TFP and Technical assignment, please contact Procurement Department of OJSC MMC Norilsk Nickel in writing. Department Director – Mr. Ivanov, Dmitry Leonidovich (Voznesenskiy per., 22, Moscow, Russia, 125993, fax 007-495-785-58-08).
