6. The passing of quality control

Our system of rules and internal controls is constantly kept under review in order to identify new areas for improvements in the work of our audit teams. The quality control system in place at KPMG stipulates a wide range of measures aimed at ensuring the good faith and objectivity of employees during their work. The professional review system implemented to oversee the work of Partners involved in the audit process enables us to facilitate the high level of their work and ensure steadfast compliance with professional audit standards, backed by our own, even more rigorous quality control standards.

Thanks to these measures, you can be confident that our audit will meet high standards of quality and reliability.

KPMG external quality control

As a member of KPMG International, KPMG in Russia is subject to annual and thorough quality control audits of the services that we provide. The audits are performed by international KPMG audit practices. Member firms of the KPMG international network must demonstrate their adherence to high standards of quality of compliance with audit standards requirements and applicable legislation, and apply approaches, methodology and technological solutions that have been approved centrally, which enable KPMG Partners and professionals to provide agreed and consistent services globally. Quality control at KPMG is a comprehensive and detailed process.

The quality control process is split into stages – the quality performance review programme (“QPR”) and assessment of the existing risk management controls and processes (“Risk & Compliance”).

QPR is performed by experienced partners from other KPMG offices who did not participate in the audit engagement subject to review. The main requirements on the annual QPR can be summed up as follows: independent Partners review 5-10% of the total number of hours spent on engagements for the company's clients. The review takes approximately 1-2% of the total time spent on the selected engagement.

The work selected for review is often high-risk work. Furthermore, each of our audit partners should undergo an engagement review at least once every three years irrespective of his/her client portfolio.

The Risk & Compliance review is also performed by experienced partners. The review includes the review and testing of risk management documentation, procedures and control. An office is allocated a specific rating based on the results of the annual review.

KPMG has always prioritized quality control and risk management issues. At present, a Risk Management Partner and Principal work at KPMG's office in Moscow, while a Partner and Senior Manager are responsible for the organization of quality review. The employees holding key quality control and risk management positions are assisted by several other partners and managers, for example, Quality Control Reviewing Partners for audits with specific risks and from the Department of Professional Practice, who perform the mandatory repeat review of all the auditor's reports issued by KPMG.

JSC KPMG is a member of the Association "Sodruzhestvo" and has the Primary Registration Number of the Entry in the State Register of Auditors and Audit Firms 12006020351.

In 2010, 2013 and 2016 JSC KPMG received the opinion of the Audit Chamber of Russia based on the results of a review of the quality of the audit and compliance with professional ethics (No.159 dated 30 September 2010, No.207 dated 28 November 2013 and No.80 dated 6 July 2016). In 2019 JSC KPMG received the opinion of the Russian Union of Auditors based on the results of a review of the quality of the audit and compliance with professional ethics (No. 261/19 dated 25 November 2019).

In 2014, KPMG underwent an external quality assurance review by the Federal Financial and Budgetary Oversight Service (Rosfinnadzor) responsible for external quality control of audit firms engaged in statutory audits of public-interest entities.
