

Moscow, November 1, 2021 — MMC Norilsk Nickel, the world's largest producer of palladium and high grade nickel and one of the largest producers of platinum and copper, announces the transformation of its corporate security unit.

The updated business unit will report to Vladimir Potanin, the company's president. Its main objectives: to develop cooperation with Nornickel's divisions and operations at all production sites, and take cooperation with federal and regional law enforcement agencies to a higher level. The focus will be on the monitoring of production facilities and incident prevention, as well as information security technologies.
